ICE-STICK AESTHETIC COOLING DEVICE

ICE-STICK

This cooling device from The Aesthetic Group in France provides a great non-drip solution for pre- and post- procedure for your patients. The ICE-STICK is composed of an inner cartridge that can be removed from the hard plastic casing and placed in the freezer until needed. The refreshing aluminum head stays cool for hours to cool areas of the face and body.

Used frequently in aesthetic medicine practices to reduce pain, swelling, and risk of hematomas. This device can be cleaned and reused.

Warning - This product becomes very cool and should not be applied directly to skin for a minimum of 5 minutes after removal from freezer. Clean and disinfect the product before use. Use only on the skin. Not a medical device. Do not boil or leave near a heated surface.
